

# RAHUL CHHABRA

 chhabra.odesk.mca@gmail.com

Full Stack Developer

## SUMMARY

Detail-oriented and highly motivated Full Stack Developer with experience designing, developing, and implementing dynamic web applications. Skilled in modern JavaScript frameworks, performance optimization, and creating responsive, user-friendly interfaces. Passionate about writing clean, efficient code and continuously learning new technologies.

## EDUCATION

Masters of Computer Application  
2008

## SKILLS

- React JS
- Node JS
- Vue.js
- Angular JS
- JavaScript, jQuery, TypeScript
- PHP
- Laravel, Codeigniter, and Yii
- CakePHP Framework
- PostgreSQL, MongoDB
- MySQL
- HTML, CSS, RESTful API
- Development
- Git and Version Control
- WordPress/Joomla
- Quasar/Cordova

## PROJECTS

- Project: Mr. Crypto Mining  
URL: <https://mrcryptomining.com/login>

Description:

This project involves the development and deployment of a scalable and efficient cryptocurrency mining operation aimed at generating digital assets through blockchain-based proof-of-work (PoW) algorithms. The primary objective is to design, build, and maintain a secure, energy-optimized crypto mining infrastructure capable of mining popular cryptocurrencies such as Kaspa coin.

**Tools & Technologies:** React.js (Frontend), Node.js (Backend), MongoDB (Database)

- Project: AllySolutions frontend  
URL: <https://dev.vendorpro.allysol.io/login>

Description: Developed a responsive registration and authorization UI with real-time form validation. Integrated user prompts for background checks and consent. Ensured secure session handling and dynamic updates for account status visibility.

**Tools & Technologies:** React.js (Frontend), AWS sam lambda in Node.js (Backend), MongoDB (Database)

- Project: AllySolutions CRM  
URL: <https://dev.admin3205.allysol.io/login>

Description: Built secure APIs to handle user registration, identity verification, and background check integration. Implemented validation logic, data storage with MongoDB, and admin controls for monitoring and approving user accounts.

**Tools & Technologies:** React.js (Frontend), AWS sam lambda in Node.js (Backend), MongoDB (Database)

- Project: Analytics Admin – Thrive AI  
URL: <https://dev.corp.thrivelabs.ai/login>

Description: Managed data tracking and analytics setup for Thrive AI, a mental health and personal growth mobile app. Implemented dashboards to monitor user engagement, feature usage, and retention metrics. Ensured accurate data flow from the app to analytics tools, supporting data-driven decisions for product improvement and user experience enhancement.

**Tools & Technologies:** React.js (Frontend), Node.js (Backend), Firebase (Database)

# EXPERIENCE

---

SoftWeaver Technologies  
March 2012 to April 2015

Freelancer  
April 2015 to Present

- Project: Brand Raise

URL: <https://dash.brandraise.io/>

Description: Monitored and analyzed performance data for BrandRaise's micro-influencer sales platform. Delivered insights on influencer-driven sales, customer acquisition, and brand awareness. Enabled brands to optimize campaigns and pay only for measurable results.

**Tools & Technologies:** React.js (Frontend), Node.js (Backend), MongoDB (Database)

- Project: WellHomes Client Portal: Manage Your Home with Ease

URL: <https://wellhomes.portalcliente.net/#/login>

Description: Welcome to the WellHomes Client Portal, your centralized hub for managing all aspects of your home. Log in to access your account, view property details, track maintenance requests, and connect with our team for seamless support. Your home management experience made simple and efficient.

**Tools & Technologies:** VueJs, QuasarJs(Frontend)

- Project: Tempore Client Portal: Streamline Your Property Management

URL: <https://tempore.portalcliente.net/>

Description: Access the Tempore Client Portal to efficiently manage your property needs. Log in to view your account information, monitor maintenance requests, and stay connected with our team for exceptional support. Your go-to solution for seamless property management.

**Tools & Technologies:** VueJs, QuasarJs (Frontend)

- Project: Básico Sales Portal: Simplify Your Sales Operations

URL: <https://ventas.basico.es/#/>

Description: Welcome to the Básico Sales Portal, your comprehensive platform for managing sales activities. Access real-time data, track orders, and streamline your sales processes with ease. Efficiently manage your sales operations and boost productivity in one convenient place.

**Tools & Technologies:** VueJs, QuasarJs (Frontend)

- Project: Client Portal: Centralize Your Account Management

URL: <https://portalcliente.net/>

Description: Access the Client Portal for a streamlined experience in managing your account. Log in to view account details, track services, and communicate with support. Your one-stop solution for efficient and organized account management.

**Tools & Technologies:** VueJs, QuasarJs (Frontend)

I also have experience in automation testing using Java as the programming language, along with tools such as Playwright and TestNG. During this time, I was involved in creating and implementing automated test scripts to validate web application functionality, improve test coverage, and support continuous integration efforts. My work included creating, maintaining test suites, and ensuring the reliability and performance of automated tests for which I have been contributing to Amwell Healthcare company alongwith my team.
